

Omega Cast Removal Accessories

Stryker® 986 Cast Saw Filters

Direct Replacement Filters for Stryker® CastVac™

The Omega CC986-500 vacuum filter is a brand-new direct replacement for the Stryker® 986-500 Cast Saw Vacuum filter. It can be used in both the 986 Mobile and 987 Wall Mount vacuums. Replacing the filter every 6 months is recommended based on usage.

Our filters are designed to have the same fit and finish as the original 986-500. Whether you have one cast saw or a fleet of 986 vacuums, our filters are the answer to Stryker's discontinuation of the 940 series cast cutters.

\$169.95

Stryker® 940 Cast Saw Blades

With Stryker's announcement that they are no longer selling the 940 cast saw and cutting accessories, we understand you need a reliable replacement.

Why Omega

Decades of Manufacturing Excellence

Established in 1993, Omega Surgical Instruments specializes in surgical blade, bur, and twist drill manufacturing.

Focused On Premium Cutting Accessories

It is our belief that every patient deserves the best possible treatment. That is why Omega focuses solely on cutting accessories. We strive to produce the highest quality cutting products available by continually perfecting our line.

Global Leader

Our specialization has allowed us to supply cutting accessories to more than 30 countries worldwide.

Rigorous Quality Standards

Only the highest grades of stainless steel and carbide are selected for Omega's products. Our manufacturing processes, developed over a period of several decades, blend high tech manufacturing with individual craftsmanship. Only instruments passing a rigorous series of inspections receive the Omega symbol identifying them as the industry standard of quality.
